Professional Profile

Creative and results-driven BS Computer Science student at NUST with extensive experience in media management for non-profits and student organizations. Proven track record in brand building, social media growth strategies, and content direction. Skilled in translating organizational goals into compelling visual narratives and leveraging generative AI tools to enhance video production and digital asset creation.

Experience

AI Content Manager & Workflow Intern | ImagineArt - Vyro | February, 2026 – Present

- Manage **3** different Instagram accounts, creating and posting regular promotional content for each page.
- Use ImagineArt's AI tools to design and publish over **20+** high-quality posts and graphics on each account per month.
- Gained hands-on experience prompting and interacting with AI, which cuts down normal design time by **30-40%**

Academic Research Collaborator | NUST (Islamabad) | 2025 - Present

- Collaborating directly with core programming faculty (Sir Jaudat Mamoon) to bridge the gap between academic theory and practical software development.
- Exploring methods to translate abstract algorithmic problem-solving into interactive, visual digital formats.
- Analyzing data structures and execution logic to improve the efficiency of student-led software prototypes.

Director Media | Kirnaain (NGO) | Lahore 2024 – 2025

- Assisted in formulating media campaigns that highlighted the organization's social impact.
- Coordinated photography and videography for on-ground events to ensure real-time social media coverage.
- Streamlined the content scheduling process to maintain an active online presence.

Academic Projects

Light-weight CNN for Foliar Disease Detection | AI/ML Developer | April 2026

- Developed an optimized, light-weight Convolutional Neural Network (CNN) capable of accurately detecting foliar diseases in wheat through aerial images captured from a drone.
- Successfully deployed the model on a low-end edge device, achieving notable performance enhancements and fast inference while retaining acceptable diagnostic accuracy.
- Navigated the intensely analytical, recursive, and profoundly rewarding process of developing and optimizing practical AI systems for real-world environmental applications.

Predictive Network Traffic Optimizer (AI/ML Research) | Lead Developer | March 2026

- Spearheaded a research-driven project exploring the application of Machine Learning models to predict and mitigate network traffic congestion.
- Developed a Python-based simulation to train predictive algorithms on historical packet data, aiming to optimize routing paths and reduce data latency.
- Relevance to XR: Gained critical insights into low-latency network architectures and data packet management, which are essential for maintaining seamless, real-time interactions in multiplayer VR and Metaverse systems.

Campus Chaos: NUST Edition | *Fundamentals of Computer Programming (FOCP)*

- Developed a 2D survival game using C++ and the SFML library, featuring custom game mechanics and object-oriented design.
- AI-Integrated Design: Engineered the game's entire visual identity by generating all sprites, backgrounds, and UI elements using AI image generation tools, ensuring a cohesive and high-quality aesthetic without traditional graphic design resources.

Pakistan Stock Market Simulator (PSMS) Database | *Backend Developer* | May 2026

- Designed and implemented a robust relational database in 3rd Normal Form (3NF) to handle complex, simulated market data.
- Mapped intricate entity relationships to ensure data integrity and rapid query optimization.

- Relevance to Research: Developed the foundational backend data structuring skills necessary for managing persistent user states and real-time data tracking in shared spatial XR environments.
-

Leadership & Campus Involvement

National University of Sciences and Technology (NUST) | 2025 – 2026

Deputy Director of Human Resources | NUST Hack Club | March 2026 – Present

- Manage team coordination and drive recruitment strategies for large-scale technical events and hackathons within the university's premier technical club.

Media Executive | NUST Entrepreneur Club (NEC)

- Collaborating on media campaigns to promote entrepreneurial events and startup culture on campus.

Media Executive | NUST Excursion Club (NXC)

- Documenting travel and recreational events, creating high-energy content to boost student participation.

Media Executive | NUST ACM Student Chapter

- Creating technical and event-based content for one of the leading computing societies at NUST.

Competitive Programmer & Hackathon Participant | Various Events | 2025 - 2026

- Actively participate in multiple individual and group hackathons, focusing on rapid prototyping, algorithmic problem-solving, and software delivery under strict time constraints.
 - Competitor in university-level AI challenges, focusing on the practical application and evaluation of generative models.
-

Education

Bachelor of Science in Computer Science (BSCS) | National University of Sciences and Technology (NUST), Islamabad | 2025 - 2029

- **Current CGPA:** 3.44
 - **Relevant Coursework:** Fundamentals of Computer Programming, Data Structures, Linear Algebra, Interactive System Design.
-

Skills

- **Core:** Object-Oriented Programming, Systems Architecture, Relational Database Design (3NF), 2D/3D Rendering Logic, Rapid Prototyping.
 - **Technical:** C/C++, Java, Python, SQL, C# (Familiar), Unity 3D (Learning), SFML Library, Git/GitHub, Figma, Node-based AI Workflows, Midjourney/DALL-E.
-
