Lahore, Pakistan

EDUCATION

National University of Science & Technology (NUST), Islamabad – B.Sc. Computer Science – **CGPA: 3.44** 2025 – 2029

Key Courses: Fundamentals of Computer Programming (C++), Object Oriented Programming (Java), Information and Communication Technology (Python), Linear Algebra, Multivariable Calculus, Database Systems, Digital Logic Design.

Government College University (GCU), Lahore – Intermediate (ICS) – **Percentage: 91%** 2023 – 2025

PROFESSIONAL EXPERIENCE

TeleCrew – Backend Developer 2025 - 2026

- Increased **sales conversion by 30%** by engineering robust backend data pipelines and CRM integrations, enabling the team to seamlessly process and manage **2000+ US-based leads**.
- Scaled **annual revenue by 2x** by architecting scalable, **secure server-side infrastructure** to support new strategic partnerships in the US, **ensuring system reliability** for a rapidly growing customer base.

ImagineArt (Vyro) – UGC Intern 2026

- Decreased **design time by 40%** by implementing AI tools to generate **60+** high-quality posts monthly across **3 accounts**.
- Boosted **brand visibility by 10%** by curating and publishing promotional content tailored to diverse Instagram audiences.

Mehndley – Founder 2026 - Present

- Eliminated the need for desktop editing software by engineering a **full-stack Node.js web app** for custom dance medleys.
- Enabled real-time, browser-based audio manipulation by architecting a server-side processing engine using **FFmpeg and Wavesurfer.js** and made making medleys **2x easier**.

Kirnain (NGO) – Co-Founder & Director Web & IT 2024 - Present

- Boosted **membership and volunteer applications by 50%** by designing, developing, and deploying the organization's first fully responsive website.
- Streamlined operations and team workflows by implementing **centralized IT systems** and **automated scheduling tools**.

RESEARCH & PROJECTS

LendAHand (Local Task Marketplace) – OOP Project (Java & JavaFX for UI) 2026

- Engineered an MVC-architected desktop app featuring a **live bidding system, escrow wallet, and Google Gemini API integration**, utilizing Gluonhq (JavaFX Maps) data and Haversine formula to **dynamically rank** student tasks by proximity.

Pakistan Stock Market Simulator – Database Project (MySQL Backend) 2026

- Designed a robust relational database in **3rd Normal Form (3NF)**, mapping intricate entity relationships to ensure **data integrity and query optimization** for handling complex simulated market data.

Campus Chaos – FOCP Project (C++ and SFML for UI) 2026

- Developed a custom **2D survival game using C++ and SFML**, engineering the visual identity by generating all sprites and UI elements with **AI tools** to achieve a cohesive aesthetic without traditional graphic design resources.

LEADERSHIP & EXTRA-CURRICULARS

NUST Hack Club – Deputy Director Human Resources 2026 - Present

- Executed fruitful **large-scale hackathons** by managing team coordination and executing targeted **recruitment strategies**.

NUST Entrepreneur Club – Media Executive 2026 - Present

- Promoted campus startup culture by designing and executing collaborative **media campaigns for entrepreneurial events**.

Competitive Programming & Hackathons – Participant 2026

- Delivered software solutions under **strict time constraints** by focusing on fast prototyping and algorithmic problem-solving.
- Evaluated practical applications of generative models by competing in multiple **university-level AI challenges**.

PROGRAMMING LANGUAGES, SKILLS & INTERESTS

Programming Languages: C/C++, Java, Javascript, SQL, Python, HTML, CSS

Skills: MS Office, Object Oriented Programming, Relational Database Design, System Architecture, Full-Stack Development

Interests: Entrepreneurship, Technology, Machine Learning, Artificial Intelligence, Football
